

Become a GivEnergy installer

Build your business with the
battery storage market leader

The **energy storage industry** is booming. Collectively, our **installers** generate **£35,000,000** per month fitting GivEnergy products. Join our **installer network** and grow with us.

Who we are

GivEnergy is the UK's best-selling battery storage brand. Our range includes inverters, battery systems, EV chargers, energy management software, and a host of supporting accessories. Together, these products create an end-to-end ecosystem for customers to control their energy.

Now, we're looking to take our market-leading solutions to even more homes across the UK. And to do that, we need great installers like you.

Why join our installer network?

As a GivEnergy installer, you'll be joining us just as our momentum is accelerating. Interest in home storage batteries is through the roof – which means we'll be sending lots of opportunities your way.

And that's before we mention all the additional reasons to come on board, such as:

- ✓ No joining fee, plus free training
- ✓ High demand all year round
- ✓ Opportunities for large and specialist projects
- ✓ 5000 installations made per month
- ✓ Lucrative industry with 500% growth
- ✓ Average value of £10,000 per job

WE MAKE **LIFE EASY** FOR OUR **INSTALLERS**

When you become a **GivEnergy installer**, you're getting your hands on **market-leading products** that are **simple to fit**, and supported by a **stellar team**. Here's how it works:

1

Become an approved installer

You'll get free GivEnergy product training, complete with all the resources you need. Once completed, you're set to work with our solutions on a dedicated 'approved installer only' basis.

2

Get your queries

We feature approved installers on our website. Interested leads in your area can then find you and send their queries. So, we'll feed in business on top of the business you already self-generate.

3

Give your quotes

Your leads are in your hands to assess and quote for as you choose. You own which work you take on, what rates you charge, and when you complete projects.

4

Complete the installation

You can buy the kit for the job directly from a preferred wholesaler. Then, it's a matter of installing the required GivEnergy solution, completing the job, and taking your payment.

5

Grow with us

We look after our installers. You can refresh your training annually, access all the latest materials and tools, get advice from the support team, and more. So, we can continue thriving together.

Work with the best battery storage solutions,
from the best team.

Quality

We design, engineer, and manufacture our full range of products in-house. This ownership ensures premium quality. Each component works smoothly, with zero compatibility issues.

Support

If you (or your customers) need help, we've got you covered. Our technicians are only ever a call away, and we have field engineers primed to step in as needed.

Sustainability

You can feel proud fitting GivEnergy products. Each installation makes the world more sustainable – helping to reduce carbon emissions as well as energy poverty.

Opportunity

As energy uncertainty intensifies, appetite for energy storage systems is growing at pace. Our products are sought after, and you will be too as a qualified installer.

"The GivEnergy system is a great product at a great price, there's great customer service, great warrantee and it's easy to install. We've literally tried and tested the product ourselves, so we know how good it is and can pass on this experience to customers. We're seeing energy storage systems become increasingly popular so we're looking forward to a successful partnership with GivEnergy for many years to come."

Greg Bishop, Managing Director at NGRE
